ASSOCIATE

- 9566853015
- thangarajhariharan75@gmail.com
- Kochi
- 3 Years of experience

KEY SKILLS

- Informatica IICS
- Informatica Powercenter
- Pentaho
- Talend
- ETL Development
- ETL Testing
- Data Integration
- Data Migration
- SQL
- Oracle SQL
- PostgreSQL
- Dimensional Modeling
- RDBMS
- Git
- Azure DevOps
- Data Warehousing (SCD Type 1/2)

EXTRA-CURRICULAR ACTIVITIES

Corporate Cricket Club

Been a part of Cognizant Cricket Club and represented a lot of tournaments and won many awards.

ACHIEVEMENTS

Certifications & Recognition

Completed Microsoft Azure AI Fundamentals (AI-900) certification.

PROFILE SUMMARY

Results-driven Data Integration Specialist with a strong engineering background in Instrumentation & Control and a proven track record of rapid career progression (promoted through 3 technical tiers). Expertise spans end-to-end ETL/ELT pipeline development, full-lifecycle data warehousing, and large-scale legacy migrations. Proficient in Python and SQL (Oracle & Teradata), with extensive hands-on experience utilizing enterprise tools like Informatica PowerCenter, IICS, Pentaho, and ODI. An OCI Certified Foundations Associate combining technical acumen with strong team, task, and time management skills to deliver scalable, high-performance data analytics and integration solutions.

WORK EXPERIENCE

Associate Cognizant

Feb 2023 - Present

Promoted: Programmer Analyst Trainee -> Programmer Analyst -> Associate

Project 1: Legacy ETL Migration & Development (CMT Project)

Role: ETL Developer / Migration Specialist

- End-to-End Development: Analyzed complex business requirements to design, develop, and deploy end-to-end ETL solutions using Pentaho Data Integration (PDI).
- Legacy Migration: Spearheaded the large-scale data migration of legacy ETL pipelines from Pentaho to Oracle Data Integrator (ODI), ensuring exact data reconciliation and minimal system downtime.
- Pipeline Scalability: Built scalable data integration pipelines and robust architectures to support enterprise-level reporting, business intelligence, and analytics initiatives.
- CI/CD Automation: Implemented CI/CD deployment pipelines for ETL artifacts using Azure DevOps and Git, streamlining release cycles and automating production deployments.
- Cross-Functional Collaboration: Partnered closely with business analysts and technical stakeholders to translate complex business rules into robust, automated ETL workflows.

Project 2: Enterprise Data Store (EDS) Project

Role: Full-Stack ETL Developer & QA Engineer

- Informatica Development: Designed and developed high-performance ETL enhancements using Informatica PowerCenter and IICS (IDMC / Cloud Data Integration) to support enterprise data integration.
- Dimensional Modeling: Developed complex data transformations and successfully implemented Slowly Changing Dimension (SCD) Type 1 and Type 2 methodologies for core dimensional tables.
- Full-Stack Testing Ownership: Owned the data quality lifecycle end-to-end, specializing in ETL and Data Warehousing testing, including Source-to-Target validation, Unit Testing, SIT, Regression, and UAT.
- Performance Tuning: Optimized complex SQL queries and Informatica workflows on Oracle and PostgreSQL databases to improve processing performance and reduce data loading windows.
- Production Deployments: Managed the end-to-end lifecycle of development enhancements, driving the combined coding, testing, and final deployment of ETL artifacts into the production environment.

PROJECTS

Enterprise Data Warehouse ETL Testing

12 Months

- Performed Source-to-Target (S2T) data validation using Oracle SQL and PostgreSQL to ensure data accuracy and integrity.
- Executed Unit Testing, System Integration Testing, Regression Testing, and UAT support for ETL workflows.
- Validated ETL mappings, transformations, and data quality rules and conducted data reconciliation between source and target systems.

- Created and executed test cases based on business requirements and logged and resolved ETL defects with development teams.
- Generated testing reports and supported release validation activities.

Internal Enterprise Data Integration Platform

19 Months

- Developed ETL mappings, Mapping Tasks, and Taskflows using Informatica IICS (IDMC) to consolidate data from multiple business applications into a centralized data warehouse.
- Implemented business transformation and validation rules and built SCD Type 1 and Type 2 logic for dimensions.
- Performed data migration, reconciliation, and source-to-target validation to ensure consistency.
- Created and optimized SQL queries in Oracle and PostgreSQL and managed code deployments using Git and Azure DevOps.

HR Data Warehouse & Analytics System

9 Months

- Developed and maintained an HR Data Warehouse solution integrating employee, payroll, attendance, and organizational data for reporting and workforce analytics.
- Designed ETL jobs and transformations using Pentaho Data Integration (PDI) and implemented data cleansing and validation processes.
- Built dimension and fact table loading processes and automated daily and periodic data loads.
- Performed source-to-target validation and optimized ETL jobs for performance and reliability.

University Analytics System

12 Months

- Led development activities for the University Analytics System addressing data integration and reporting requirements.
- Designed and implemented data schemas using Informatica PowerCenter and ensured data governance and timely deliverables.

EDUCATION

B.Tech / B.E. | Instrumentation and Control Engineering, 2022

Saranathan College of Engineering, Tiruchirapalli

12th, 2018

Tamil Nadu, English

Marks - 73%

10th, 2016

Tamil Nadu, English

Marks - 91%

CERTIFICATIONS

Azure AI Fundamentals (AI-900)
